

JCA Holdings

Company Profile

ESTABLISHED 2021 | NORTHERN CAPE | 100% WOMAN OWNED

Material handling and transport at a project site

Materials supply and transport

JCA Holdings supplies sand, stone and aggregates to the civil and construction industries, supported by material transport, concrete product manufacturing and truck and trailer breakdown services.

Based in Danielskuil, we serve clients across the Northern Cape, with a focus on dependable supply, efficient delivery and practical support on site.

About JCA Holdings

Founded in 2021 by Mrs Amiralda Wellen, JCA Holdings is a 100% woman-owned South African business. The company was established to meet demand for river sand, building sand and material transport in Danielskuil, Postmasburg, Kuruman and Kathu.

Our management team combines industry experience with sound business practices to support efficient project delivery. A mobile breakdown team supports our trucks across projects, helping to reduce downtime and keep material moving.

Our direction

Our vision is to become a leading supplier of sand, stone and aggregates to the South African construction industry. We aim to expand our product range and enter new markets while maintaining the quality and service our clients expect.

Our values

Efficiency, quality, teamwork, accountability, integrity, safety and excellence guide how our management and employees work with clients and with one another.

DoL COID registration number	990001518902
Director and shareholder	Amiralda Venezuela Wellen 100% shareholding
Registered office	7 Stuart Street, Danielskuil, 8405 Northern Cape, South Africa

Working relationships

We focus on fulfilling orders on time, offering competitive pricing and building lasting client relationships. Where opportunities arise, we also connect clients with potential customers to support their businesses.

Materials supply and transport

We supply and transport construction materials for civil works, building projects and bulk material requirements. Our service includes deliveries on behalf of clients and transport between suppliers, customers and project sites.

Our material range

Product group	Materials available
Sand	River sand and building sand
Stone and aggregates	Road stone and aggregates
Filling material	G5 material
Soil and landscaping material	Topsoil / red soil and river pebbles

Project supply

Our project experience also includes the supply of crusher dust and crusher sand. We support construction and infrastructure work through both material supply and transport assignments.

Transport and operational support

Our transport work ranges from sand deliveries to bulk G material movements. We support delivery schedules with experienced management and a breakdown team that travels between projects to help keep trucks operational.

Sand loaded for transport

Core service area

Danielskuil, Postmasburg, Kuruman and Kathu form our core service area. Our project record also includes work in Groblershoop, De Aar and Leeu-Gamka.

Manufacturing and breakdown services

Manufacturing

Launched in 2025, our manufacturing division produces bricks, building blocks and water channels for the building and construction market. We supply Douglas, Campbell and Griekwastad in the Northern Cape, with the aim of expanding our reach nationally.

Our current range includes stock bricks, maxi bricks and building blocks, as well as water channels and V-drains made on request. We use river sand in our bricks, with a focus on strength and a smooth finish. Products are tested before dispatch, with test results provided to clients.

Bricks, blocks and drainage products from the manufacturing division

We plan to extend the range to include kerbstones and interlocking paving bricks.

Truck and trailer breakdown support

Established in 2025, our breakdown team supports project operations, including bulk transport projects exceeding 20,000 tonnes. The team also provides breakdown services in and around Danielskuil, Kuruman, Kathu and Postmasburg.

- Mechanical repairs for trucks and trailers
- Arc and CO2 welding
- Truck electrical fault support

By combining transport operations with mobile technical support, we work to reduce vehicle downtime and maintain continuity on client projects.

Client and project experience

Our previous and current assignments cover material supply, deliveries on behalf of clients and bulk transport. The following record includes the years and quantities associated with each assignment.

Materials and transport assignments

Client or project	Scope and volume	Years
